

Release Notes include New Features, Enhancements, and Fixes.

Internal users can use the ISSUE code to view the original Issue in JIRA.

External users can use the menu path in the DESCRIPTION to navigate to the page (screen) of the software application where the change was applied.

## NEW FEATURES

ISSUE	DESCRIPTION OF THE NEW FEATURE
<a href="#">MM-61</a>	<p><b>User Options - Changing/Resetting Passwords.</b> Users now have the ability to change their password. (Prior this was only available to administrators, which poses the security risk that another person knows the user’s password.) When a client user forgets her password, this feature allows the system to send a secure password reset link to the user so she can regain access without the help of admin staff. This will eliminate a large number of HelpDesk calls and is a state-of-the-art security feature. It goes hand-in-hand with the recently released Two-Factor Authentication (2FA, MM-162, V2.8.0).</p> <p><b>Benefit:</b> <a href="#">Improved convenience and security.</a></p>

## ENHANCEMENTS

ISSUE	DESCRIPTION OF THE ENHANCEMENT
<a href="#">MM-1079</a>	<p><b>MAR - Discharged Clients Should Not Show on MAR.</b> When a patient is discharged, it will now automatically stop all MAR entries (without the user having to explicitly remove them). Only active patients will show on the MAR screen.</p> <p><b>Benefit:</b> <a href="#">More systematic workflow process when discharging patients, less opportunity for error.</a></p>
<a href="#">MM-1953</a>	<p><b>Export Tool   Support new VOB form in Export Tool.</b> The recently developed Patient data export tool (MM-1817, V2.9.0) now also supports the recently updated VOB forms (MM-1141, V2.9.0).</p> <p><b>Benefit:</b> <a href="#">Ensures continuity when patient data is exported at the request of client.</a></p>

## FIXES

ISSUE	DESCRIPTION OF THE FIX
<a href="#">MM-1665</a>	<b>Modifying a Custom form should not change any previously signed custom forms.</b> This fixes an issue where a change in a custom form had previously also affected previously generated instances of said form.
<a href="#">MM-1967</a>	<b>Unselecting a "checkbox (ON)" in an intake form will not stay unselected after saving.</b> This fixes an issue where the status of checkboxes (On/Off) in Intake Forms was not remembered correctly.
<a href="#">MM-847</a>	<b>Combined Schedule - Overbooking not linked to group/appointment.</b> This will prevent over-booking of users across individual appointments and group sessions at the same time.
<a href="#">MM-1579</a>	<b>Tasks - send reply to another user fails without any message.</b> This fixes an issue where a Task is forwarded from one user to another without properly notifying the recipient and moving the task.
<a href="#">MM-1672</a>	<b>Group Session printouts are different between Print Visit and Print Chart in the encounters Tab.</b> This fixes differences between the print out of group sessions depending on the context and which button is used to invoke the printout.
<a href="#">MM-1883</a>	<b>Using Microsoft Edge to login to a site with 2FA enabled.</b> This fixes an issue experienced only with the Edge browser around sending duplicate validation tokens.
<a href="#">MM-1945</a>	<b>Exported MAR - Dose is missing.</b> This fixes an issue with a discrepancy between the MAR export and the MAR print Log.

## KNOWN ISSUES
