

Release Notes include New Features, Enhancements, and Fixes.

Internal users can use the ISSUE code to view the original Issue in JIRA.

External users can use the menu path in the DESCRIPTION to navigate to the page (screen) of the software application where the change was applied.

NEW FEATURES	
ISSUE	DESCRIPTION OF THE NEW FEATURE
MM-0611	<p>Data list - substance abuse history. Ability to create a section template for the substance abuse history and include it in custom forms so that this information will show on every form with this template.</p> <p>Benefit: Eliminates need for double-entry of substance abuse history (in Bio and face-sheet). Improved efficiency and accuracy.</p>
MM-1030	<p>MAR - bulk sign off (sign for more than one med at a time). A user can sign off multiple Medication Administration Records from one screen with one signature all at once.</p> <p>Benefit: More efficient workflow.</p>
MM-1993	<p>Master Treatment Plan (MTx). Ability to view, edit and sign off the collection of all individual Tx plans for one specific patient in one place (rather than having to open each individual Tx plan and view / edit / sign off).</p> <p>Benefit: More efficient workflow.</p>

ENHANCEMENTS	
ISSUE	DESCRIPTION OF THE ENHANCEMENT
MM-2083	<p>Discharging a patient using a custom discharge form. Patient can now be discharged from the default form or a custom form containing the words "Discharge Summary" in the form name – as well as from the demographics by entering discharge date.</p> <p>Benefit: More consistent workflow when discharging patients and more flexibility for clients to create their own custom forms for discharge process.</p>

FIXES

ISSUE	DESCRIPTION OF THE FIX
MM-1876	Level of Care not respecting start date. This corrects an issue where a LoC entered for a future date was incorrectly using the current date at the time of the entry instead of the future start date.
MM-2036	Deleting a document will hard delete the record from the dbo.Documents table. This corrects the delete to a soft-delete, marking the record as deleted but not actually removing it (or the corresponding document).
MM-2103	iPad Patient Profile not available and VOB form is not opening after Modernization. This corrects an issue where the new VOB form was not opening on the iPad app.
MM-2117	Making multiple changes to a long custom form will double the fields in the form. This corrects an issue where changes to custom forms were not processed properly, leading to duplicated fields in one form and deleted fields in previous versions thereof.
MM-2123	CMD- patient demographics not crossing over from MM to CMD. This fixes a configuration issue with a handler for the integration between MM and CollaborateMD. (This was already released as patch v2.10.1 to immediately fix this problem for one customer.)
