

Release Notes include New Features, Enhancements, Fixes, and Known Issues.

Internal users can use the ISSUE code to view the original Issue in JIRA.

External users can use the menu path in the DESCRIPTION to navigate to the page of the software application where the change was applied. Consult with your Solution Consultant for more information.

NEW FEATURES	
ISSUE	DESCRIPTION OF THE NEW FEATURE
MM-2604	iPad app needs way to edit demographics. Ability to enter new and edit existing values on demographics tab on iPad Patient Page. This includes things such as name, SSN, DOB, gender, contact info, employer, etc. Benefit: Generally, move towards parity between iPad and browser based app and specifically ability to complete InTake process solely on iPad.
MM-2633	Bridging The Gap - LabGen Lab Interface. One-directional results interface from Comtron's LabGen LIS system into MedicalMime EHR system using HL7 results file standard. Benefit: Ability for Bridging The Gap customer to see and store client test results within the MedicalMime EHR system.

ENHANCEMENTS	
ISSUE	DESCRIPTION OF THE ENHANCEMENT
MM-0077	Slow Response Spooling Improve performance of Client Page for large census and/or large number of forms. Performance of initial load of Client Page with large census was improved 5x.
MM-0338	Default forms - Prepared by – Committing. Change logic of default forms such that a user isn't set as the preparer until they have made a change and save or sign the form. Benefit: Just viewing a form doesn't make a user the preparer.
MM-1775	Dashboard-Remove New Admit Workflow Icon This removed a remnant of a former client-specific workflow implementation.
MM-1995	Forms-Remove Date Created Field in grid view. Remove third date field from the forms view. Date established and Date completed are sufficient. Benefit: Reduce potential confusion.
MM-2646	Advantage Linked Issue - ADV-229 - Expire Patient Consent after 1 year. Advantage recently implemented a new rule indicating that patient consent forms expire (after 1 year) and are no longer marked as complete. This enhancement ensures that MedicalMime deals with this properly and shows consents as expired, not incomplete. Benefit: Consistent patient consent behavior and display across both Advantage and MedicalMime.
MM-2657	Treatment plan Editor missing next review date. New Treatment Plans now have a field for Next Review Date, which is configurable (to be shown or not) at the site level and is shown both in the form and the printout. Benefit: Workflow for Tx Plan review is configurable per site.
MM-2737	iPad - Improve date/time selector components More intuitive entry of date/time fields.
MM-2738	Lock Intake Forms in Administration section once Client has signed off to prevent changes. This is a compliance matter since edits after signature would make facilities non-compliant.

FIXES	
ISSUE	DESCRIPTION OF THE FIX
MM-0362	iPad - new preadmission - no MRN
MM-0368	iPad - lvl of care colors not showing on client card
MM-0822	Groups - delete client - group note still appears in chart
