

Release Notes include New Features, Enhancements, Fixes, and Known Issues.

Internal users can use the ISSUE code to view the original Issue in JIRA.

External users can use the menu path in the DESCRIPTION to navigate to the page of the software application where the change was applied. Consult with your Solution Consultant for more information.

NEW FEATURES and ENHANCEMENTS

ISSUE	DESCRIPTION OF THE NEW FEATURE OR ENHANCEMENT
MM-0221	Forms - Addendum feature: Users can now make an addendum if needed on signed forms, for example to correct errors or add important findings. This way the status at time of signature is clearly kept separate from the status after the addendum.
MM-3201	Client Screen-View Caseload icon- Add Case Manager: This allows to group the clients page not just by therapist as before, but now also by case manager.
MM-3202	View Caseload Icon- View clients that are not assigned to someone: Ability to show clients who are not assigned to a therapist.
MM-3239	Forms-Client Refused to sign option: Ability to designate when a client was presented with, but refused to sign a form. (This will stop alerts for incomplete intake or custom forms marked as requiring a signature.)
MM-3258	Change Patient to Client in Archive, Filter and Import: Renamed “patient” to “client” in two places for consistency with rest of the system.
MM-3269	Move Clients page Case Load View from Flex to HTML: As part of a larger technical refactor, this new functionality is implemented in HTML to migrate away from Flex legacy technology. (Browser vendors will stop supporting Flash, the Flex container technology, at the end of 2019.)
MM-3274	Name of Facility and other information needs to print out as a header on custom forms: User can now designate a print header for Intake and custom forms to display when printing those forms.

FIXES

ISSUE	DESCRIPTION OF THE FIX
MM-3271	Photos in Bed Tracking are not showing properly: Fixed issues with client photos not showing properly in Bed Tracking view.
MM-3281	Custom Forms Categories bar is white: Displaying the custom forms category bar in blue again.
MM-3287	Users signature will change on the print out of a form: When a user changes his/her signature, forms signed before that time will keep their old signatures, both in the browser and in print.
MM-3285	Practice setting Show next review alert cannot be toggled: Fixed error in display and toggle.

KNOWN ISSUES

ISSUE	DESCRIPTION OF THE KNOWN ISSUE
MM-3288	User signature will retroactively change in the Encounters sections
