Release Notes include New Features, Enhancements, Fixes, and Known Issues.

Internal users can use the ISSUE code to view the original Issue in JIRA.

External users can use the menu path in the DESCRIPTION to navigate to the page of the software application where the change was applied. Consult with your Solution Consultant for more information.

NEW FEATURES and ENHANCEMENTS	
ISSUE	**DESCRIPTION OF THE NEW FEATURE OR ENHANCEMENT**
MM-1291	**Demographics-Archive**: Changed Archive Patient to Delete Client for naming consistency.
MM-1894	**Demographics - Marital Status - Add Single**: Added "single" as an option to list of marital status in client demographics.
MM-3360	**Make Demographics page more customizable**: Major improvements to usability and customizability of client demographics page, including - adding new fields to existing sections - showing or hiding fields within a section and even entire sections on demographics page - adding a new custom section - editing all sections on one page (reduces number of clicks, especially for new clients) This also migrates from Flex to HTML.
MM-3371	**Update Level of Care Window**: In the context of the above change, the admission date is now no longer editable from the edit demographics dialog of a discharged client. This will force users to go through the proper Readmit Client workflow, rather than just changing a prior admission date.
MM-3376	**Add an exclusion and inclusion list to the client export tool for M2Select**: Admin-level improvements to support export of client data, especially for large census customers.

FIXES	
ISSUE	DESCRIPTION OF THE FIX
	No bug fixes in this release.

KNOWN ISSUES	
ISSUE	DESCRIPTION OF THE KNOWN ISSUE
	No new known issues.
