

Release Notes include New Features, Enhancements, Fixes, and Known Issues.

Internal users can use the ISSUE code to view the original Issue in JIRA.

External users can use the menu path in the DESCRIPTION to navigate to the page of the software application where the change was applied. Consult with your Solution Consultant for more information.

NEW FEATURES	
ISSUE	DESCRIPTION OF THE NEW FEATURE
MM-3108	<p>Alerts - Something is due in X days: Ability to track next review steps in Treatment Plans as a way to facilitate workflow throughout (not just at completion by means of required signatures). This simplifies management of custom treatment plans by pointing out upcoming and/or overdue next review steps.</p>

ENHANCEMENTS	
ISSUE	DESCRIPTION OF THE ENHANCEMENT
MM-155	<p>Medical Record Number (MRN) reflect admission number: Ability to filter client-specific data by admission / care episode and quick display of current admission number (1st, 2nd, 3rd, etc.). This greatly improves management of repeat clients with multiple admissions / care episodes.</p>
MM-3192	<p>Signature Permission and Dashboard Improvements: Refinement of custom conditions of when a custom form status is considered incorrect (and will disappear from the staff dashboard). This allows combinations of various roles in the facility to have to sign off on any given custom form.</p>
MM-3210	<p>Add additional option in the Frequency dropdown in Insurance Authorization</p>

FIXES	
ISSUE	DESCRIPTION OF THE FIX
	No bug fixes this release

KNOWN ISSUES	
ISSUE	DESCRIPTION OF THE KNOWN ISSUE
MM-3192	<p>Signature Permissions: When there are both User and Client signatures required for a custom form, those with User roles need to sign first and the client is to sign last. If Client signs first, other roles may disappear from the required signature list displayed in the staff dashboard.</p>
