

Release Notes include New Features, Enhancements, Fixes, and Known Issues.

Internal users can use the ISSUE code to view the original Issue in JIRA.

External users can use the menu path in the DESCRIPTION to navigate to the page of the software application where the change was applied. Consult with your Solution Consultant for more information.

NEW FEATURES	
ISSUE	DESCRIPTION OF THE NEW FEATURE
<a href="#">MM-3200</a>	<b>Create Lab Interface for Essential Scientific Labs.</b> Adds another MM lab interface used in production.

ENHANCEMENTS	
ISSUE	DESCRIPTION OF THE ENHANCEMENT
<a href="#">MM-578</a>	<b>Intake/custom forms - different default forms for different levels of care:</b> Treatment and associated custom forms are different based on the level of care (LOC). Now the system allows to designate different custom forms as the default for each specific LOC. This simplifies the workflow and eliminates errors.
<a href="#">MM-3158</a>	<b>Calendar Appointment Search by both provider and client:</b> The system now offers an integrated search dialog for all appointment types (including group sessions and blocks) with search by client and provider. The search dialog is also implemented in HTML (as Sidebar)
<a href="#">MM-3190</a>	<b>Need to be able to stop one Counselor from editing another Counselors Notes:</b> This has been a much-requested enhancement to only allow edits on patient notes by the associated counselor (or an administrator). Other counselors can view, but not modify the notes.
<a href="#">MM-3244</a>	<b>Move Bed tracking page from Flex to HTML:</b> The entire Bed Tracking page has been re-implemented in HTML and received a few improvements and bug fixes along the way. This is the second page (after the Staff Dashboard) implemented completely in HTML.
<a href="#">MM-3265</a>	<b>View Beds Grouped by Housing in Bed Tracking:</b> Allows to group beds by housing, simplifying the user experience and reducing possibility of errors. (Similar to Case Load view on Clients Page.)

FIXES	
ISSUE	DESCRIPTION OF THE FIX
<a href="#">MM-3226</a>	Rows duplicating in Bed Tracking
<a href="#">MM-3216</a>	Toggling Current vs History on Next Reviews widget also toggles Diagnoses widget

**KNOWN ISSUES**

ISSUE	DESCRIPTION OF THE KNOWN ISSUE
<a href="#">MM-3267</a>	Using Calendar Appointment search with Edge: When clicking Search Calendar Appointment, the SideBar opens to the right of the end of the browser window (only on Edge browser). Work-around: Extend the width of the browser window to see the SideBar.
