

# Simple – Powerful – Reliable

So you can focus on what matters most – your patients

Medical Mime provides best-in-class patient lifecycle management for Behavioral Health/Substance Abuse (BH/SA) treatment centers. From pre-admission to billing and aftercare, Medical Mime seamlessly integrates into the natural workflow of your day-to-day operations.

## Patient Details

- Instantly view the latest information by patient and manage the entire life cycle of their care and easily update level of care without multiple click-throughs and windows
- View patient's vital signs and track progress over time to monitor treatment effectiveness
- Quickly access your facility's preloaded, default forms to easily maintain or change documentation and level of care
- Receive **automated alerts** to keep patient care on track
- View the latest status on missing forms or signatures, diagnosis, next steps etc

## Calendar and Session Management

Remove the complexity of group scheduling with our intuitive group/individual session calendars

- Easily schedule, conduct and document your sessions, **in one place**
- Quickly identify appointment types through color coding and view topics for discussion
- **Save considerable time** by easily accessing the right forms and documentation **while in session** for quick and easy completion

## Forms

Easily access forms without the need to search system wide.

- Quickly view which forms need signed
- Receive alerts for incomplete forms or upcoming deadlines
- Ensure efficient and timely billing

## Medications

Fully compliant Medical Administration Records (MAR) enable complete documentation for all prescribed medications

- View all active and past medications
- Support for both paper and E-prescriptions
- Schedule medications and create alerts for timely administration
- Includes lab integration

**Put the power of billing in  
your own hands!**

## **Delayed authorization numbers are the culprit on nearly 80% of the recovery billing you capture!**

Clean claims, first time! Stop losing revenue for services you have provided. Alerts on documentation are sent to your clinical team to complete. Unlike other EMRs, Medical Mime collates & validates all the required billing data before billing can process the claim, including:

Authorization Numbers

Signature on Forms

Dates

Service Type

## **Analytics**

Our robust analytics provide a 360-degree view of your patient life cycle. C-Suite and Executive users can easily identify gaps, monitor operational efficiency and make informed decisions regarding the overall health of your organization. The rest is up to you - act on what you find and watch the progress of your work.
